

MUZAMMIL SATTI

Data Science Student | Aspiring Data Analyst

Islamabad, Pakistan | +92 3285717749 | mgsatti2342@gmail.com | [GitHub: github.com/satti-112](#) | [LinkedIn: linkedin.com/in/muzammil-satti-a5129034b](#)

PROFESSIONAL SUMMARY

Motivated Data Science student at COMSATS University Islamabad with hands-on experience in Python, R, SQL, Excel, and Power BI. Demonstrated ability to clean, analyze, and visualize real-world datasets through multiple independent projects spanning sentiment analysis, sales analytics, and business intelligence. Available for full-time work and seeking a Junior Data Analyst role to apply analytical skills and contribute to data-driven decision-making.

EDUCATION

BS Data Science | [COMSATS University Islamabad](#) 2025 – Present

- Relevant Coursework: Data Science Fundamentals, Database Systems

Intermediate (F.Sc Pre-Engineering) | [Cadet College Palandri](#) AJK Board, Mirpur

- Marks: 1045/1200
- House Prefect

Matriculation (SSC) | [Cadet College Palandri](#) AJK Board, Mirpur

- Marks: 1064/1100

TECHNICAL SKILLS

Languages	Python (Pandas, NumPy, Matplotlib), R (tidytext, dplyr, ggplot2, stringr)
Databases	SQL (Queries, Joins, Aggregations), Database Design
BI & Visualization	Power BI (DAX, Data Modeling, Matrix Visuals), Excel (Power Query, Pivot Tables)
NLP / Text Mining	Sentiment Analysis, Tokenization, BING / AFINN / NRC Lexicons
Data Skills	Data Aggregation, Data Anonymisation, Data Cleaning & Preprocessing
Soft Skills	Analytical Thinking, Problem Solving, Communication, Time Management

CERTIFICATIONS

Introduction to Data Science Job Simulation

[Commonwealth Bank](#) | [Forage](#)

Google Data Analytics Professional Certificate

[Google](#) | [Coursera](#)

Microsoft Excel for Data Analysis

[Microsoft](#)

What is Data Science?

[IBM](#) | [Coursera](#) | [Higher Education Commission, Pakistan](#)

Python for Data Analysis: Pandas & NumPy

[Coursera](#) | [Higher Education Commission, Pakistan](#)

Present with Purpose: Create/Deliver Effective Presentations

[IBM](#) | [Coursera](#) | [Higher Education Commission, Pakistan](#)

Collaborate Effectively for Professional Success

[IBM](#) | [Coursera](#) | [Higher Education Commission, Pakistan](#)

Commonwealth Bank Certificate Tasks: Data Aggregation & Analysis • Data Anonymisation • Propose Data Analysis Approaches • Designing a Database

PROJECTS

Jane Austen Sentiment Analysis | [R](#) | [tidytext](#) | [ggplot2](#) | [janeaustenr](#)

- Performed sentiment analysis on 6 Jane Austen novels (~700K+ words) using BING, AFINN, and NRC lexicons
- Tokenized text into tidy format using `unnest_tokens()` and custom regex for chapter detection (including Roman numerals)
- Tracked emotional arcs chapter-by-chapter; identified *Pride & Prejudice* as the most positive novel
- Visualized sentiment trends using `ggplot2` bar charts and line graphs for comparative cross-novel analysis

Uber Data Analysis | [R](#) | [dplyr](#) | [ggplot2](#) | [lubridate](#)

- Analyzed Uber ride data to uncover peak demand hours, busy pickup zones, and seasonal trends
- Cleaned raw CSV data including handling missing values and formatting datetime fields with `lubridate`
- Created time-series and heatmap visualizations to identify high-demand patterns across days and months
- Derived insights on driver allocation efficiency based on hour-of-day trip distribution

Mart Sales Data Cleaning & Analysis | [Microsoft Excel](#) | [Power Query](#) | [Pivot Tables](#)

- Cleaned and standardized raw mart sales dataset; removed duplicates, fixed formats, and handled nulls using Power Query
- Built interactive sales dashboard using Pivot Tables and charts to track KPIs: revenue, quantity, and category performance
- Improved data interpretation accuracy by 30% through structured visual layout and conditional formatting

Student Performance Analysis | [Python](#) | [Pandas](#) | [Matplotlib](#)

- Cleaned and analyzed a dataset of 500+ student records using Pandas
- Identified key factors affecting academic performance including attendance and study hours
- Visualized findings using Matplotlib to surface actionable trends

Power BI Sales Dashboard (DigiSkills Exercise) | [Power BI](#) | [DAX](#) | [Power Query](#) | [Data Modeling](#)

- Merged and cleaned 1997–1998 multi-file transaction data using Get Data → From Folder in Power BI
- Built relational model linking Customer_Lookup to Transaction Data; manually recreated relationships after deleting auto-generated ones
- Created DAX measures: Qty Sold (SUM), Total Orders (COUNT), and Bulk Orders (Qty > 4)
- Validated all results using a Matrix visual; added calculated columns for Customer Priority and Current Age

ADDITIONAL INFORMATION

- Strong interest in Data Analytics, Natural Language Processing (NLP), and Machine Learning
- Completed industry job simulation with Commonwealth Bank through Forage platform (August 2025)
- Actively building GitHub portfolio: github.com/satti-112
- Open to internship opportunities in data-driven and AI-focused organizations
